Re: Midwest Plant Foods N. Hillcrest
Owner - Clyde Murphy Route 1, Bois bArch
Manager - Randy Arnold
Business Phone 866-1914

Talked to Mr. Arnold about condition of ditch in front of the plant. He indicated that their sump under the hoppers had a lift pump that goes to the ditch. This was their only direct discharge to this ditch. However when it rains this sump receives flow from across the loading area. This area was very dirty at the time of inspection. Indicated we would contact Mr. Murphy later on this matter.

Randy Lyman

On the north side of the building a large quantity of brownish colored material in solution was observed. It appeared to be the result of fertilizer products spilled on the ground and being washed out in solution by recent rainfall. Vegetation in the ditches and storm drainage areas was killed and affected somewhat downstream to the west along the railroad track. Brown color prevailed in the water approximately 100 feet to the west of

Picture taken.
